

HOW WILL CI/CD AFFECT OUR BUSINESS

What is CI/CD?

CI makes developer tasks like source code integration and version control more efficient so software can get into production faster.

CD automates software testing and deployment

WHY CI/CD?

REDUCED TIME TO MARKET

Launch new features to market faster

IMPROVED MEAN TIME TO RESOLUTION

Only minor changes in code are needed to resolve issues

ACCURATE PROGRESS MONITORING

Provides a measurable set of performance metrics

EFFECTIVE AUTOMATION TESTING

More consistent testing with less man hours

EFFICIENT INFRASTRUCTURE

Automated and consistent deployment of servers

MAX CONSUMER DEMAND SATISFACTION

Helps you adopt a consumer first approach

WHY CI/CD?

RAPID FEEDBACK CYCLE

Get feedback on a per feature basis

ENHANCE COMMUNICATION AND COLLABORATION

Bring down the walls between teams and enhance cooperation

CLOUD BASED DEVELOPMENT

Makes the processes faster, consistent and more efficient

SHORTER REVIEW CYCLES AND FAST DEBUGGING

Encourage devs to commit their code more frequently
